2017.08.25 RELEASE NOTES

CONTENTS

Improvements

INVENTORY

NS-2083 Improved Lot Auto-Close Process

The lot auto-close process was updated to close lots that have zero balances and open any closed lots that have balances.

SALES ORDER

NS-2298 Updated Sales Orders to Support Workflow Driven Status Changes

The workflow driven status change was enabled for sales orders. When the status in the 'Move To Status Name' field has been selected for a workflow step, the sales order is automatically moved to this status when the workflow step is selected and the transaction is saved.

Bug Fixes

COMPANY

NS-2306 Fixed Item Attributes to be Company Specific

Due to a bug in the system, item attributes were not filtered by Data Entity Company and all attributes configured for different Data Entity Companies were displayed on Item records. The issue is now resolved.

FRAMEWORK

NS-2314 Fixed Error Messaging

Some error messages were not displayed correctly in the system. These missing error messages were added back to the system.

PURCHASING

NS-2300 Fixed GL Date for Customer / Employee Sales Transactions

Previously, the transaction date was used as the GL Date instead of the GL Date a user entered in the transaction properties. The issue is now fixed and the journal entry is created for the GL Date.

SALES ORDER

NS-2142 Fixed Price Lists to Void Updated Prices

Previously, when a user updated a Price List price for an existing price list period, the previous price list entry was not correctly marked as a voided and it was still displayed in the Price List History Inquiry as an active price. The issue is now fixed.

NS-2332 Fixed Date Filtering Issue on SO Shipments Inquiry

Previously, users couldn't filter any of the date columns on Sales Order Shipments Inquiry. When a user entered a date filter, no results were found. The issue is now fixed and all date fields can be filtered.

NS-2334 Fixed Date Filtering Issue on SO Shipments List View

Previously, users couldn't filter any of the date columns on Sales Order Shipments List View. When a user entered a date filter, no results were found. The issue is now fixed and all date fields can be filtered.
