Improvements

Commodity Procurement

NS-3118 Added a Filter Row to the New CP Ticket Page

A filter row was added to the grid section of the New Commodity Procurement Ticket page to allow users to filter the grid section details.

Purchasing

NS-3099 Added New Columns to Delivery Ticket List Views and Inquiries

New columns 'Site Processed' and 'Price List ID' were added to the following list views and inquiries:

- Tickets List View
- Ticket Lines List View
- Tickets Inquiry
- Ticket Lines Inquiry
- Stat Area Details Inquiry

The columns display the Site Processed and Price List ID properties assigned to the Delivery Ticket. The columns are not in the system view.

NS-3100 Added a New Column to Sales List Views and Inquiries

A new column 'Price List ID' was added to the following list views and inquiries:

- Fisherman Sales List View
- Fisherman Sales Lines List View

- Fisherman Sales & Tender Resales Inquiry
- Sales List View
- Sale Lines List View
- Sales Inquiry
- Sales Lines Inquiry

The column displays the ID of the price list assigned to the transaction. The column is not in the system view.

NS-3124 Updated Ticket Item Combobox on Fish Ticket Price List

The Ticket Item combobox on Fish Ticket Price List was updated to a multi-column combobox to display the following details ticket item details:

- Specie ID – Description
- Condition ID – Description
- Grade Description
- Disposition ID – Description
- Sold Condition ID - Description

Sales Order

NS-3113 Updated Customer and Address Records to Filter Sales Order Price List Class

The Price List drop-down menu on Customer and Address records were updated only to display Sales Order Class price lists.

Sales Programs

NS-3085 Added a User-Friendly Transaction Class Validation Message to Settlement

A user-friendly validation message "Default Transaction Class is missing. Verify Sales Program Preferences" was added to Sales Program settlement validation. This message is displayed if the Sales Program preferences are missing the default transaction class when the settlement is validated or processed.

Bug Fixes

Inventory

NS-3109 Fixed Production Transaction Integration

Due to a bug, the Inventory Production transaction process failed, when the system did not have an attribute setup for "Production Date & Time". The issue is now fixed.
