2017.11.22 RELEASE NOTES

CONTENTS

Improvements

Framework

NS-2394 Improved Excel Export Performance

Previously, users were occasionally experiencing timeout errors when exporting large data files to Excel. The work item included improvements to increase the reliability of the feature and to fix the timeout errors.

Sales Order

NS-2654 Added Print Toolbar Icon to Shipments List View

Print toolbar icon was added to the Sales Order Shipments list view.

Note that printable reports must be assigned to the Shipments list view in order to print documents from the page. This can be done from the Manage Reports page.

Bug Fixes

Inventory

NS-1947 Fixed Clean Out Feature for Find Lots

Due to a bug, the Allocate check box was not auto populating the Units/Weight fields when the selected item was units only or weight only managed. The issue is now fixed.

Sales Order

NS-1580 Fixed Sales Order Item Sequencing

Previously, when new items were added to a Sales Order transaction or existing items were removed, the line sequencing was not corrected until the transaction was saved. This issue is now fixed.

NS-2685 Fixed Shipped Date Saving

Previously, when a user changed a saved Shipped date on Sales Order transaction records, the date reverted back to the original Shipped date preventing the user from changing the date. The issue is now fixed.
